

# Magnetful 120

# Combined power of **Pneumatic & Magnetic Lifting**

BPM is combining the ease of magnetic lifting with ergonomic and safe operation of pneumatic handling.

Due to the perfect load distribution, Magnetful 120 enable almost weightless lifting and handling in all directions with a wide range of different loads.

Pneumaticly activated magnets and safety features make our products versatile and a powerful choice for industries such as manufacturing, assembly, logistics, and material handling.

#### Safe

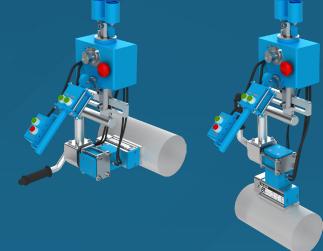

Operator can't turn the magnet off while the load is lifted. Magnet can be turned off only when the load is safely on the surface.

The system does not permit lifting unless the magnet is placed in the correct position and fully activated.

#### **Flexible**

Magnetful 120 can grab loads from the top or the side. Can be used to lift loads in different sizes and shapes.

## The Manipulator

The balance of the load is maintained by connecting two steel cables to the balance unit. Manipulators, either floor mounted or ceiling mounted and consists of two arms, has a total of two brakes on the arm rotation axis.

Works with dry, filtrated (40  $\mu$ m) and oil free compressed air (min. 0.7/0.8 MPa).

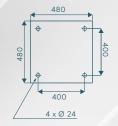

120 kg max. weight capacity. 3.000 mm max. radius. 1.800 mm vertical lift. 50 nl/min max. air consumption.

Weight Capacity / kg		120
Max. Radius / mm	Rmax	3000
Min. Radius / mm	Rmin	420
Vertical Lift / mm	Н	1800
Min. Vertical Lift / mm	*h	200
Max. Height / mm	*Hmax	2635
Max. Ceiling Height / mm	*Hf	2550
Min. Height / mm	*Hmin	2000

<sup>\*</sup> Marked dimensions can change according to the customer request.

### The Magnet

Designed for use with air operated hoists. Pneumatically activated and disabled. Each model also has an emergency release, so you always have full control.

Model	Max. Loc flat	d capacity (kg) round	Max. Load capacity from (mm)	L			sions H1	(mm) R	X/Y	Weight (kg)
